

play verto™

# verto answer types

# welcome to **play verto**

How do we achieve such high completion rates in our gamified surveys? Truth be told, the magic of engagement is in our varied, playful and intuitive answer types. Answer one of our surveys and you'll be met with visually stimulating, accessible and rewarding experience.

- 3 The Select One/Many
- 3 The Quiz
- 4 The Range
- 5 The Tap
- 6 The Matrix
- 7 The Rating
- 8 The NPS
- 9 The Prioritise
- 10 The Freeform
- 11 Tokenomics
- 12 Gallery

# The Select One/Many

Our most popular answer type that invites players to choose from a list, or a grid, and select one or multiple, including an 'Other' which players can add their own answer.

Using the list for any number of answers, and the grid for an even number of answers keeps it looking tidy on mobile

**Select one**

**Why do you think adults want you to go to school?**

- To understand the world and help make it better
- To understand who I am, what I want and become a member of my community
- To have a good career
- To enjoy learning and become a great learner for the future
- To get good grades and pass exams
- Other (please type)

**Select one**

**For your evening meal, what do you typically eat?**

- A meal prepared before (batch cook)
- A cold/uncooked meal (e.g. salad/sandwich)
- There isn't always food available for an evening meal
- An oven/microwave hot meal
- A small meal - soup / toast
- A freshly cooked hot meal

# The Quiz

Turn verito into a quiz, with our 'correct / incorrect' feature built into our select answer type. Great for testing knowledge, or just for fun!

**Select one**

**Which planet is known as the "Red Planet"?**

- Saturn
- Mercury
- Mars ☒
- Venus ☐
- Jupiter
- Mercury

**Select one**

**Which planet is known as the "Red Planet"?**

- Saturn
- Mercury
- Mars ☒
- Venus ☐
- Jupiter

New for 2025

Data is still captured the same way as non-quiz questions, still giving you the insight you need.

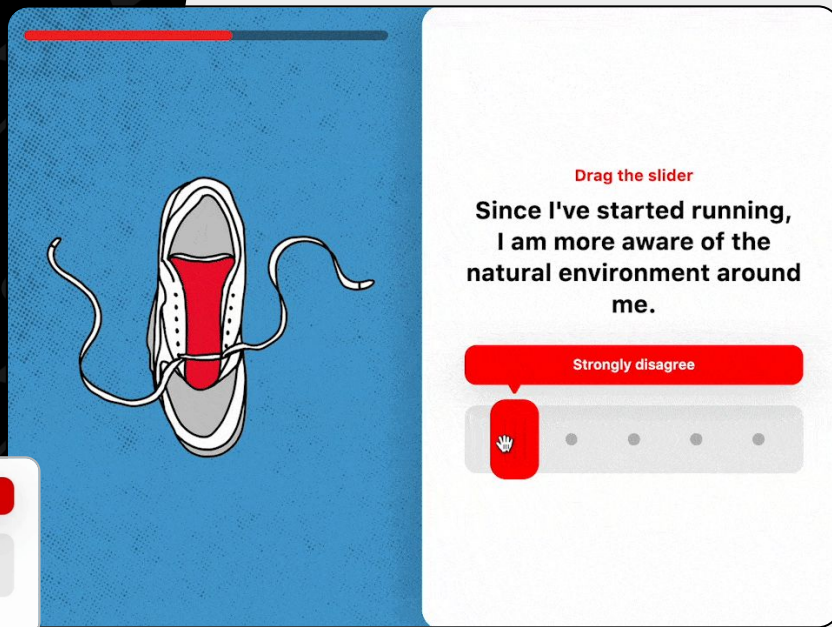

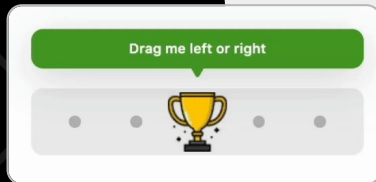

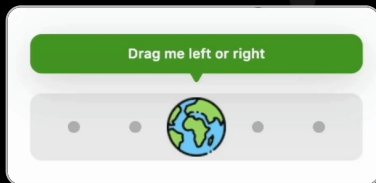

# The Range

Probably the most playful answer type we have, the range invites players to share their thoughts (usually an emotion, or a scale of agree/disagree) on a sliding scale that uses playful animations to deeply engage the player.

Five assets are created for this answer type, one for each answer which gives the visual an animated/stop motion feel as the player drags the icon left and right

# The Tap

This answer type offers up a 'matrix' style data collection, enabling many data points from one question set. Players can choose from the three options per card, and once tapped, the card will animate off screen.

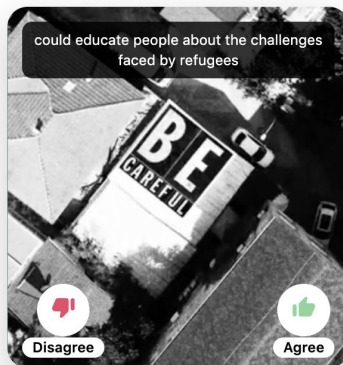

Each card is considered a new question, and can have 2 or 3 options for the player to select from.

Cards can have photos, GIFs or animations.

Tap agree or disagree

What do you notice about our club?

Offering programs for different needs and interests

Disagree

Agree

# The Matrix

While the Tap can offer up to three choices across a multitude of questions, the matrix offers up to eight!

Gather rich data across a variety of sub-questions giving the player more choice than ever. With custom labelling and branding, this is a great take on a traditional matrix, gathering huge data in a short time.

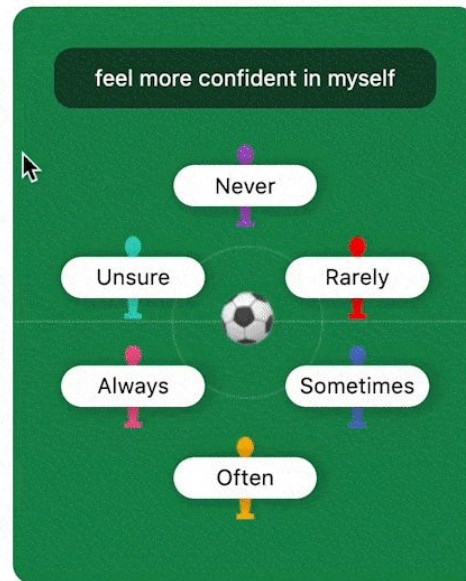

Use this answer type if you want the player to have more than three choices.

The labels always stay in the same place, to ensure consistency for the player.

**Playing sport or being active helps me...**

# The Rating

Rating answer type is great for capturing thoughts on how good something is perceived to be. A star rating is the most common, but the icons can be changed to anything to be more playful and representative of the survey design.

The rating answer type can also be used as an alternative to the range, gauging emotion

Tap on a star

**Do you find the Rekindle learning material interesting?**

Tap icon

**How do you feel about the physical environment that you run in?**

Love it

# The NPS

The Net Promoter Score offers players a range from 0-10, usually 0 being the worst, and 10 being the best. Players tap and hold the 'liquid' as we call it, and drag it up or down to their desired number. The container can also be changed to various shapes, again leaning into further brand alignment.

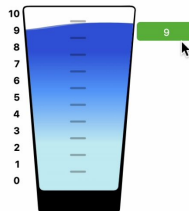

The labels don't have to be numbers! Add agree scales or emotion ranges.

Use the traditional 0-10, or anything in between - such as a 4 or 5 point scale.

Drag label up and down

On a scale of 0 to 10, how engaged do you feel the local community is with our club?

Select a number

How excited are you for the next run?

On a scale of 0-10, 10 being very excited

Drag label up and down

"If you're happy as a child, you'll be happy as an adult"

# The Prioritise

Based on our select one/many user interface, prioritise allows players to tap/click and drag options into an order of priority. This gives more data points than a select one/many, as data can then show the order of favourites from your player base.

Five answers is a good number here, as it allows enough options for the player and analysis can provide a top three of the five answers

Click and drag to arrange in order of priority

**Which skills do you think you need to start change?**

-  Teamwork and kindness
-  Creativity and curiosity
-  Courage and determination
-  Listening and communicating
-  Strength and resilience

# The Freeform

Allowing players to tell us, in their own words, how they feel about a topic has increased the authenticity of our datasets we capture. Real voices, inclusive of positive and negative, ensure players thoughts are really heard. The text input can be accompanied by a voice recording option too.

Choose your character limit to allow long entries, or keep them short and sweet.

Hear their voice! You can also turn on voice recording feature to allow players to record their answer.

# Tokenomics

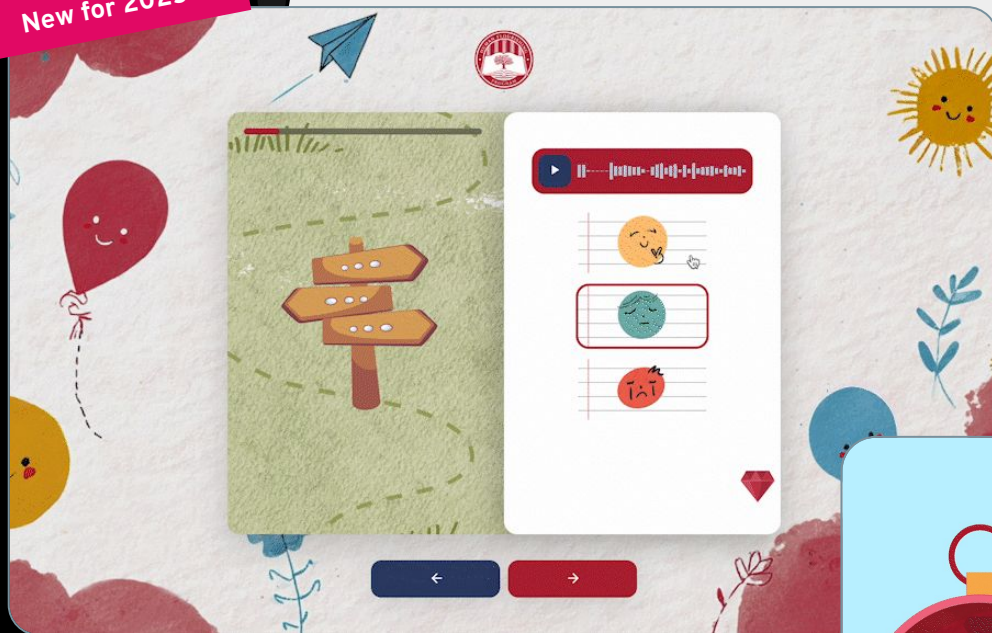

Verto's new token-collection feature adds further curiosity and momentum to each experience. Players can collect themed tokens throughout the verto. While not tied to real-world rewards (yet!), it is a simple visual mechanic that encourages continued play and boosts engagement, especially for younger audiences. At the end, their progress is revealed through playful design moments, revealing what their tokens have unearthed.

Change the icon players can collect to stay on message. Collecting data about sport? Collect footballs or basketballs. Food? Pizza or tomatoes. Education? Collect books or pencils.

The customisation is endless!

New for 2025

**Case study:** For Harvard's Human Flourishing Program, we're using gemstones to help engage 5-8 year olds. At the end we reveal a treasure chest, giving them a visual reward.
